Information; *Test Interpretation; *Test Results;
*Vocational Aptitude; Vocational Counseling
IDENTIFIERS *Armed Services Vocational Aptitude Battery

ABSTRACT

This report contains Armed Service Vocational Aptitude Battery profiles for seven occupational categories and for selected jobs within each category. Results from four ASVAB aptitudes form the basis of each profile: word knowledge, arithmetic reasoning, space perception, and attention to detail. These are essentially equivalent to the following aptitudes listed by the Dictionary of Occupational Titles: verbal, numerical, spatial and form perception, and clerical perception. The profiles will be useful to the vocational counselor in establishing the aptitude of a student for various occupations and jobs. (Author/DCW)

TECHNICAL RESEARCH REPORT

ARMED SERVICES
(ASVAB) PROGRAM

ED153141

Technical Research Reports distributed by the Military Enlistment Processing Command are designed for primary use by high school counselors and other personnel involved in the use and interpretation of the Armed Services Vocational Aptitude Battery (ASVAB).

This final report was submitted by Applied Psychological Services, Incorporated, Science Center, Wayne, Pennsylvania 19087, under Contract DAKF15-76-C-0128 with the Testing Directorate, Headquarters, Military Enlistment Processing Command, Ft. Sheridan, Illinois 60037. MAJ Clara L. Tucker, Research and Publications Division, was the contract monitor.

This report has been reviewed and cleared for open publication and/or public release. There is no objection to unlimited distribution of the report to the public at large, or by DDC to the National Technical Information Service.

PREFACE

This report was submitted by Applied Psychological Services, Incorporated, Wayne, Pennsylvania, under Contract DAKF15-76-C-0128. Dr. Arthur Siegel was project director and principal investigator and was assisted by Mr. Philip Federman. The work was accomplished between June 1976 and March 1977, and the contract was monitored by MAJ Clara L. Tucker, Research/Publications Division, Headquarters, Military Enlistment Processing Command, Ft. Sheridan, Illinois.

This MEPCOM Technical Research Report is a reprint of the final technical report submitted by Applied Psychological Services, Inc. All data contained in the original report are reprinted here.

The information contained in this Technical Research Report is intended as a supplement to the occupational information in the Second Edition of the Military/Civilian Occupational Source Book, DOD 1304.12Y, January 1978, which is available through the local ASVAB representative.

Armed Services Vocational Aptitude Battery (ASVAB) Profiles for Selected Occupations and Jobs

Armed Services Vocational Aptitude Battery (ASVAB) profiles are given herein for seven occupational categories and for selected jobs within each of the occupational categories. The profiles are based on four ASVAB tests. It is believed that these profiles will be of use to the vocational counselor from a number of separate points of view.

First, the profiles will be of value in establishing the aptitude of a student for the various occupations and jobs. The profiles present for each of four selected aptitudes which are measured by the ASVAB, "unacceptable," "minimally acceptable," and "desirable," ASVAB percentile score zones and limits. A student's percentile score on each of the four selected tests may be compared with each of these zonal limits for the tests to determine his aptitude for a given occupation or job. Students who achieve percentile scores falling in the "desirable" zone may be considered, at least for the four aptitudes considered, to have aptitude scores which are at a "desirable" level for the occupation/job under consideration. Students achieving percentile scores in the "minimally acceptable" zone may be considered to possess marginal aptitude relative to the occupation or job under consideration. A percentile score or a set of percentile scores in the "unacceptable" zone may be considered to indicate aptitude levels which are too low for the occupation/job under consideration.

Second, the job profiles present any military equivalent and any related military service job of each civilian job. Accordingly, a person who meets the civilian job profile aptitude requirements will probably meet the requirements for the equivalent and related service jobs associated with each profile.

Content of Profiles

Each profile, job or occupation, is based on four ASVAB aptitudes: word knowledge, arithmetic reasoning, space perception, and attention to detail. These are essentially equivalent, respectively, to the following aptitudes as listed by the **Dictionary of Occupational Titles**: verbal, numerical, spatial and form perception, and clerical perception.

Additionally, each job profile contains the following information:

1. The pertinent name and code number as listed by the **Dictionary of Occupational Titles**
2. The equivalent Army and Navy job titles and job codes
3. The USOE cluster to which the job pertains
4. The pertinent occupational group as given in the **Dictionary of Occupational Titles**
5. The pertinent **Dictionary of Occupational Titles** occupational category

The occupational profiles contain the following additional information:

1. The occupational category as listed by the **Dictionary of Occupational Titles**
2. The pertinent occupational group
3. The USOE cluster

Development of the Profiles

The job profiles are derived from available validity data relative to the ability of each of the four ASVAB tests considered to predict success in training. Each job profile is based on at least one military validation study relating ASVAB scores to student success in training for the pertinent job. In some cases, the validity data of several studies were combined. This integration lends an extra degree of robustness in these cases.

To derive the job profiles from the validity data, standard statistical techniques were employed along with the reasonable assumptions that: (1) aptitudes which are relevant to a given job should require higher scores than aptitudes which are not relevant to the occupation, and (2) a one standard deviation difference adequately describes the difference between the "unacceptable" and the "desirable" level of an aptitude for a given job.

Use of the Profiles

To use the job profiles, the four ASVAB test percentile scores of a student are plotted and the obtained plot is compared with the profile plot for a given occupation/job of interest to the student. An obtained plot of the scores of an individual student that falls largely or exclusively in the "desirable" zone indicates that the student has achieved scores which are largely at or about the "desirable" level for success in training for the occupation/job in question. As scores fall from the "desirable" zone to the "minimally acceptable" and the "unacceptable" zones, less aptitude for the occupation/job in question is indicated.

If a student is interested in a job for which no profile has been provided, the profile of a closely related job, or of the occupation in which the job falls, may be employed. Of course, in these cases, the accuracy of the information provided is lowered.

Profile Organization

The profiles which follow are organized by occupational category and by job within occupation. The job profiles within each occupation are organized in ascending order of Dictionary of Occupational Titles codes.

PROFILE FOR PROFESSIONAL, TECHNICAL, AND
MANAGERIAL OCCUPATIONS

DRAFTER, CIVIL (005.281)

Occupational Category:
